

Sanitary Sewer Rehabilitation Project

Oak Creek's Water and Sewer Utility's Sewer Rehabilitation Plan will be starting March 13th, and Advance Construction out of Green Bay will be performing the work. The attached Map shows the areas work will be performed and the order in which they will move through the designated areas. The type of work that will be performed includes physically excavating the ground/road to expose the problematic area, repair, back fill and restore the area accordingly. Pavement restoration of areas should take place within a day or two, however final restoration of the vegetative areas may be at a later date in accordance with the average growing season. Due to the nature of the work we cannot estimate exactly how many days it will take to do the work in each area or give exact dates that they will start, therefore, as the project commences and moves from one area to the next we will try to get notice to customers as soon as possible.

If you have any questions, please contact me at 414.570.8200 – ext. 38 or sricker@water.oak-creek.wi.us

Thank you,

Seth Ricker
Construction Coordinator
