NOTICE

Dear customer,

The Oak Creek Water and Sewer Utility has started work on this year's sanitary sewer rehab project. You are receiving this notice because your home is adjacent to one or more of the work items. Please note this work only involves the sanitary /sewage system and not the water system.

As Phase One (phases referenced in previous letter) wraps up this week, Phase Two will be starting the week of April 17,2017. You may have or will soon see trucks cleaning and videoing the sanitary system ahead of this second phase.

Phase Two involves a sanitary lining operation where a separate crew installs a cured in place (CIP) liner in the existing and repaired underground sanitary line. There should be minimal effects to you during these operations. However, during this Phase Two you will have interrupted sanitary service and will receive individual notices from the contractor (Visu-Sewer) one to two days before any interruption.

Please refer to our website: <http://www.water.oak-creek.wi.us/> to view a location map of the work areas and a proposed order that Phase Two activities will progress. We will continually add updates to the project so please check back often.

If a problem should occur as a result of the work, please report it directly to the Oak Creek Water & Sewer Utility by calling 570-8210. After 4:00 pm, please call 768-7060.

Thank you for your patience and cooperation while we work to improve your sanitary system.
